

Maryland Training School for Colored Girls

This institution, located at Glen Burnie, Anne Arundel County, cares for 82 delinquent colored girls. Certain minor repairs and improvements are badly needed to maintain this property in proper condition, and for this purpose I am recommending an allowance of \$5,000 from the General Construction Loan.

MENTAL DISEASE HOSPITALS AND TRAINING SCHOOLS FOR THE FEEBLE-MINDED

Maryland maintains 4 hospitals for the care of white mental disease patients and one for colored. Two training schools for the feeble-minded, one for white and one for colored are also operated. Information with reference to this group of institutions is, as follows:

Hospitals for White Mental Disease Patients

Name	Location	No. of Patients	
Springfield	Sykesville, Carroll county	2,751	
Spring Grove	Catonsville, Baltimore County	1,933	
Eastern Shore	Cambridge, Dorchester County	415	
			5,099
			5,099

Hospital for Colored Mental Disease Patients

Name	Location	No. of Patients
Crownsville	Near Annapolis, Anne Arundel County	1,279

Training School for the Feeble-minded

Name	Location	No. of Patients	
Rosewood (White)	Owings Mills, Baltimore County	1,178	
Crownsville (Colored)	Near Annapolis, Anne Arundel County	200	
			2,657
			2,657
			7,756
			Total
			7,756

Experience indicates that the net increase in the population of the mental disease hospitals is 200 white and 100 colored patients per year. These needs are being met, as follows:

Additional buildings at Spring Grove to care for	200 patients
Maintenance appropriated for building at Eastern Shore, built but not equipped, and for which there is no appropriation	100 patients
Additional buildings at Crownsville for Colored insane	200 patients

The building program is indicated in the statement relating to the proposed General Construction Loan, and the details of necessary increased appropriations to care for additional patients are detailed in the Budgets for the several Institutions.
