

refers to the farm alone. Think of how much there is in the industrial plants and in the homes. In referring to the farms, I do not lose sight of the fact that already collections have been made but competent authorities know that a great quantity remains.

These are the facts that must be pounded home to all our people relentlessly. Habits, of long standing, are difficult to break. "WASTE" is one of the most adamant.

Certainly the people are eager to help. They must be guided. They must be informed. I have every confidence, with your help and leadership, that the people will enthusiastically respond and that OUR GOAL will be reached.

Weapons from waste is our motto—weapons that can bring peace, and freedom, and justice to the WORLD. Above all keep at it—our duty is plain. Just as our troops will not fail us, we we must not fail them.
