

1 more or less try to go along the line of crystallizing
2 the questions, getting them into the hands of the
3 Chairman and the Executive Director and then letting him
4 exercise his influence in the direction that he wants
5 information by further direction to us. In the mean-
6 time, however, I propose to keep us moving along the line
7 of education, familiarity and decision which ultimately
8 is going to have to be our responsibility.

9 Now, if he comes back and says he wants us to
10 submit one of these policy questions, then the one I
11 would submit would be that one or two that we touched upon,
12 because I think they hit on the direction and the other
13 things are the implementation in that direction and that
14 is why, actually, the first item on the agenda at the
15 first meeting was basically these two questions. However,
16 I don't want to slacken up forward movement by reason of
17 the job that has to be done here.

18 MR. BROOKS: And, Mr. Chairman, I think this
19 list that has been prepared is very valuable to the
20 Committee itself in resolving these questions.

21 THE CHAIRMAN: Yes.
