

1 that I've had in one of the houses convinces me that we
2 can operate very successfully with the unicameral legis-
3 lature and I think it would be far more desirable for
4 many, many reasons other than those stated, but which
5 have been stated in a study that has been made by your
6 Committee, your Commission reports here, which has gone
7 into great length on the pros and cons and I won't
8 repeat them.

9 One thing I would like to say, that I have
10 been most interested in ever since I came into the State
11 house is to make certain, however, that state legislators
12 remain state legislators. I would like to see some system
13 devised with a unicameral system which would put us all
14 to the test, whereby a state legislator would have
15 nothing to do with county local legislation. This may
16 not tie in exactly to this point, but I would like to
17 see this looked into further by this group.

18 THE CHAIRMAN: You will be interested to know
19 that we do have another committee that has made a study
20 of this and looked at that very question and we do feel
21 that they are tied together.
