

1 the reversion also occurs because in the estimate of the
2 number of pupils, the 340 remains stationary. It is the
3 number of pupils. Baltimore City has a research depart-
4 ment that does an annual census on how many children
5 to be expected but all Counties do not have such research
6 census. That is where the reversion occurs, as to the
7 pupils, not the program.

8 THE CHAIRMAN: Mr. Haile?

9 MR. HAILE: I have a question. This says for
10 State support to the local school system. The question
11 is, does this include private schools as well as public?

12 MR. CASE: It does not.

13 MR. HAILE: Hadn't we better say local public
14 school systems? That is the question I had. I don't
15 require an answer at this point. I just bring it to your
16 attention.

17 THE CHAIRMAN: Let me suggest that it is an
18 appropriate time to take a coffee break and maybe Mr. Case
19 and Mr. Sachs can think about that a little.

20 DR. JENKINS: Wouldn't that be covered as re-
21 quired by law?
