

1 will strike the whole phrase, with respect to taxes on
2 property, so the Section would read, and such classes
3 may include such property devoted to agricultural and
4 open space use.

5 Dr. Burdette?

6 DR. BURDETTE: I have a related question. I
7 don't know what would happen if somebody wanted to argue,
8 if it were brought up that this language coming, and
9 such classes may include such property devoted to agri-
10 cultural or open space use, if the argument were directed
11 to the view that agricultural use and open space use
12 must be in the other classes. I think the language can
13 be so read. It is certainly not intended. Much of my
14 commentary here comes from my observation that courts
15 get new meanings of land as years go by.

16 THE CHAIRMAN: I don't follow your question
17 at all, Dr. Burdette.

18 DR. BURDETTE: I gather the intent of the
19 Committee and the Commission is that there may be clas-
20 sification for agricultural use or for open space use.

21 THE CHAIRMAN: Right.
