

1 and that would not be subject to legislative control
2 once the appropriation had been made. Does your amend-
3 ment or what we are talking about now guarantee the same
4 right to the University?

5 MR. SCANLAN: I will answer that, but first
6 I disagree with the assumption in your question that the
7 only autonomy granted by your Section 3 was control, and
8 direction of its finances once they had been received
9 from the Legislature. Exclusive general supervision of
10 the institution meant far more to me.

11 MR. CASE: That is academic.

12 MR. SCANLAN: My second point is that certain-
13 ly the Section 3 as proposed in the pending motion would
14 permit the Legislature to continue the statutory autonomy.

15 MR. CASE: You are not answering my question.

16 THE CHAIRMAN: Just a second. Let him finish.

17 MR. SCANLAN: The Section 3 as embraced in the
18 pending motion would permit the Legislature to continue
19 or to augment the constitutional autonomy that the
20 University now enjoys, including complete control over
21 expenditure of its funds once appropriated.
