

1 growth. For the urban metropolitan suburban areas the
2 district government could be assigned responsibility for
3 master plans of land use and water supply, infiltration,
4 pollution control, and so forth. There are certain
5 areas, I think we have to have greater area-wide respon-
6 sibility government so that we would have sort of a two-
7 tier layer, each equally democratic, the methods resolved
8 by the area affected or by the General Assembly. This
9 is something we can discuss later, but in any event, I
10 think the necessity for an area-wide general purpose
11 government is necessary.

12 THE CHAIRMAN: Thank you, Mr. Sayer.

13 We have a practical problem with respect to
14 the hour of convening tomorrow morning. I can put that
15 to a vote since you will not be here tomorrow, Mr. Case.
16 We have debated it and if there is no further debate,
17 let's put the question to a vote.

18 MR. CLAGETT: I would have to make one further
19 comment, and that is what we are voting to abandon and
20 what the Committee has proposed in its draft is exactly
21 what you will find in Article 13 at the present time.
