By ANDREW ELLICOTT, A. M. and Professor of
Mathematicks, in the *Baltimore Academy*.

God gave to Man an upright face, that he
Might view the Stars—adore his Majesty.

* * * The Public are requested to observe, that this accurate and useful ALMANAC, is the more worthy of their attention, as the Tables of the Rising and Setting of the Sun, are adapted to the Latitude of Baltimore-Town; whereas the Almanacs formerly published, were Calculated to the Latitude of Philadelphia, which in some cases, makes a difference of eight Minutes in one Day.

* * * All Merchants, and Country Store-Keepers, both in Maryland and Virginia, may be supplied with any quantity of the above Almanacs, which will be forwarded to their Orders.—They may be had at his Printing-Office, and from the principal Store-Keepers, in Baltimore-Town, and in the Country adjacent, at the very reasonable Price of Three Shillings and Nine-Pence, per Dozen, as above mentioned.
