REPAIR AND PRESERVATION

For the first time in several years the Hall of Records was able to have two full-time workers constantly in the repair room. As a result the number of pages treated increased from over twelve thousand to over seventeen thousand, or about forty per cent.

It is interesting to note that of all the materials which went through the repair room during the year there was only one volume, Provincial Court Judgments P. S. No. 3, which is, strictly speaking, a state record. There are two reasons for this: all of the state records which were in need of repair and which were used to any extent at the Hall of Records have been put into serviceable condition, and the early county records, which were for the most part in worse condition than the state records, have come to occupy more and more of our time. I should like to call attention also to the large collection of Baltimore County Original Wills, which were generally in poor condition before their transfer to the Hall of Records last year. This collection was unusually difficult to handle because of the large number of wax seals which had to be removed before the document could be laminated and then reaffixed.
