## PHOTOCOPYING

Due to circumstances beyond our control it was not possible to repeat the excellent production record which the photostat department had made during the previous year. The total number of pages finished was 15,412 as compared with 17,453 for the fiscal year 1946. We did, however, exceed the production of our second best year, 1945, which was 14,860 pages. With our present equipment and staff we have reached our maximum possibility in so far as photostating is concerned, and we shall have to make our plans for each year on the basis of a total product of between fifteen and seventeen thousand pages.
