Total	20,574 pages

PHOTOCOPYING

A good deal of progress was made last year in our program of photostating for the use of the counties the land records through the year 1788, the originals of which remain at the Hall of Records. We completed the work in Dorchester County which had been initiated two years before, Worcester County, which began the year before, and Washington County, which began and ended in the course of the year. The work in Talbot continued satisfactorily, and we did the first volume of Montgomery records.

There remains to be done on the Eastern Shore the rest of Talbot, Caroline and Cecil Counties and on the Western Shore the rest of Montgomery and Harford Counties. Since both Caroline and Harford are late counties, as is Montgomery, our only remaining major task is Cecil County. The number of pages photocopied this year on order was greater than ever
