

As we had every reason to expect, the number of duplicate copies of early reports which other institutions can furnish us decreased during the year—no doubt this source of supply will dry up entirely within a few years. We are pleased to report, however, that we received duplicates this year from the Enoch Pratt Free Library, the University of Maryland Library, the Department of Legislative Reference and the Division of Library Extension. In addition some reports, either processed or manuscript, came to use with the files of the first two years of Governor Lane's administration. A full set of the *Reports and Official Opinions of the Attorney General* came to the Hall of Records as a deposit of the Department of Mental Hygiene. Finally, some 30,000 pages of reports and official publications were filmed from originals at the Maryland State Library.

In order to make these files readily available to searchers we have thought it worthwhile to publish here below a list of the agencies whose reports we now have complete. We hope to publish additional lists in subsequent reports.
