

Six reels of current county probate records also were added to the Microfilm Collection of the Hall of Records. Five of these reels were filmed by our staff and the remaining one was received from Hall and McChesney.

In addition to the above, we began filming the first-reader file of bills and joint resolutions of the Department of Legislative Reference which begins in 1918. This project will be kept current and will provide valuable microfilm copies of this rare material for both the Hall of Records and the Department of Legislative Reference.
