PHOTODUPLICATION

This section of the Annual Report is a sort of catch-all for archival photoduplication both photostat and microfilm. It combines:

1. Photostats and microfilm reproductions prepared from our records for clients of the Hall of Records.
2. Photographic reproductions of materials normally located elsewhere, made for our use and regularly accessioned.
3. Photographic reproductions of materials of various origins made for the use of other State Agencies and for which no charge is made.

Other microfilm activities are reflected in "Records Management", in "Land Records Project", and elsewhere in this report. There were 358 reels exposed during the year and 353 inspected exclusive of Records Management activities.
