
HUSSEY'S

REAPING MACHINE.

The increasing demand for this Machine, and its wide-spread reputation, have placed it beyond a doubt amongst the most important and useful implements of husbandry. It will cut Twenty Acres of Grain in a day, cleaner, and leave it in better order for binding, than the Cradle.

Price, \$170. Smaller size, \$100.

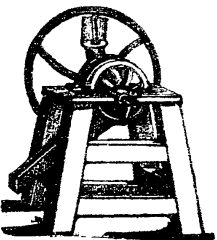

Invented and Manufactured by the subscriber at the corner of

Front and Ploughman streets,

NEAR BALTIMORE STREET BRIDGE,

BALTIMORE.

THE CORN & COB CRUSHER,

Invented and Manufactured by the subscriber at the above place, stands unrivalled; the increasing demand for it in the South, where a good article of the kind is readily appreciated, places it also on the list of useful implements.

Price, \$35 and \$25.

OBED HUSSEY.
