

BLOCKS & PUMPS.

WILLIAM THOMAS,

STILL AT HIS OLD STAND,

No. 10 ELLICOTT STREET,
BALTIMORE,

Has on hand a great variety of the above articles, which he will sell at the lowest prices, and warrant them equal to any in the city. He has lately Invented, and placed at the *corner of Baltimore and Calvert streets*, a

TWIN LIFTING AND FORCING PUMP,

Which he invites the public generally to examine. This Pump combines many advantages over the ordinary Pump: it is so constructed as to be used as a Fire Engine, or common yard pump; by repeated trials it has, with the working of two men, been made to throw a stream of water EIGHTY FEET, through two hundred feet of hose, the hose can be attached in two minutes. This will be found to be a most admirable article for Villages, Factories, Gardeners, and Farmers; it can not be put out of order half so easily as the common pump, and the cost is but little more.

☛ All Orders in the above line thankfully received and promptly attended to.
