

GEORGE PAGE.

WILLIAM BROWNE.

GEORGE PAGE & CO.**N. Shroeder, between Baltimore & Fayette Streets,****MACHINISTS AND MANUFACTURERS,**

Manufacture their Improved Patent Portable Circular Saw Mills, to go either by Horse, Steam or Water Power. These Mills have won for themselves the reputation of being the best Mills in the Country, and are now in successful operation in almost every State in the Union, where, with the same power, they are doing more than twice the work of any other mills, and may safely be pronounced amongst the greatest labor-saving machines of this or any other age. They have been twice awarded premiums by the Maryland State Agricultural Society. They also manufacture the best Horse Power in the Country. At the last great Fair of the Maryland State Agricultural Society, the merits of their Horse Power were so manifest, as to induce the Judges to award it the Highest Premium, though it had previously been awarded a Premium. It has also received Premiums at the National Fair, New York, and Fair of the Maryland Institute—strong evidence of its superior excellence. They likewise manufacture Grist Mills, Corn and Cob Crushers, Thrashing Machines, Corn Planters, Tenoning Machines, Tobacco Presses, Vertical Saws, Boring and Morticing Machines, Post Augers, Cylindrical Straw Cutters, Fanning and Separating Mills, and various other machines, all calculated to economise human labor, time and money.
