

VULCAN WORKS,

Between Hughes and York Sts., east of William,

SOUTH SIDE OF THE BASIN.

The subscribers are prepared to execute orders for Machinery of every description, embracing

MARINE AND STEAMBOAT

ENGINES AND BOILERS,

Of all the different plans in use, and particularly the Oscillating Engine, as first introduced into the United States by them, several of their make being now in successful operation, their compactness and simplicity of construction highly commending them to public favor. They also build *Locomotive and Stationary Engines, Blowing Apparatus, Rolling Mills, Sugar Mills, Flour and Saw Mills, Rail Road Cars, and Rail Road Machinery* generally.

CASTINGS of all kinds made in loam, dies, or green sand.

Having a large Establishment, employing from two to three hundred workmen, they are prepared to fill all orders entrusted to them with dispatch.

MURRAY & HAZLEHURST.
