

the municipal Water System as The Mayor and Aldermen of Frederick shall think necessary or desirable, and to provide for the payment of the interest on said bonds and for the payment of the principal thereof, when the same shall fall due and become payable.

WHEREAS, The present sources of water supply from Silver Springs, Tuscarora and Fishing Creek, which now furnish water to Frederick City, have been found to be inadequate for the purpose of supplying the city with a sufficient quantity of water; and

WHEREAS, The firm of Whitman, Requardt and Smith, Water Engineers of the City of Baltimore, after making a comprehensive study of the municipal water system and the available sources of supply, have recommended to The Mayor and Aldermen of Frederick, in a report dated February 18, 1931, that the city acquire an additional water supply by pumping water from Linganore Creek, at a cost of approximately \$200,000.00; and

WHEREAS, The State Board of Health, through its sanitary engineering department, after making a thorough study of the needs of the municipal water system and the available sources of supply, through its chief engineer, Abel Wolman, recommended to The Mayor and Aldermen of Frederick that the city secure an additional supply of water from Linganore Creek; and

WHEREAS, At a public meeting of citizens of Frederick City, held at the Court House in Frederick, Maryland, February 27, 1931, after due consideration of the reports of said Engineers and full discussion of the subject, it was decided by almost unanimous vote of those present to adopt the reports of said Engineers and secure an additional supply of water from Linganore Creek; and

WHEREAS, The city has recently added five additional feet to the height of its Fishing Creek dam at an expenditure of approximately \$17,000.00, payment for which must be provided for; and

WHEREAS, The Mayor and Aldermen of Frederick may find it necessary to make other permanent improvements to its
