

14. Examinations. When oral or written examinations are required, they shall be held at such time and place as the Board shall determine. If examinations are required on fundamental engineering subjects (such as are ordinarily given in college curricula) the applicant shall be permitted to take this part of the professional examination prior to his completion of the requisite years of experience in engineering work, and satisfactory passage of this portion of the professional examination by the applicant shall constitute a credit for a period of ten years.

The scope of the examinations and the methods of procedure shall be prescribed by the Board with special reference to the applicant's ability to design and supervise engineering works so as to insure the safety of life, health and property. Examinations shall be given for the purpose of determining the qualifications of applicants for registration separately in Professional Engineering and Land Surveying. A candidate failing on examination may apply for re-examination at the expiration of six months and will be re-examined without payment of additional fee. Subsequent examination will be granted upon payment of a fee to be determined by the Board, which fee shall not exceed ten dollars (\$10.00).

15. Certificates—Seals. The Board shall issue a certificate of registration upon payment of registration fee as provided for in this Article, to any applicant who, in the opinion of the Board, has satisfactorily met all the requirements of this Article. In case of a registered engineer, the certificate shall authorize the practice of "professional engineering", and in the case of a registered land surveyor, the certificate shall authorize the practice of "land surveying." In the case of a person who is both a registered engineer and a registered land surveyor, only one certificate shall be issued, which shall authorize the practice of "Professional Engineering and Land Surveying." Certificates of registration shall show the full name of the registrant, shall have a serial number, and shall be signed by the Chairman and the Secretary of the Board under seal of the Board.

The issuance of a certificate of registration by this Board shall be prima facie evidence that the person named therein is entitled to all the rights and privileges of a registered professional engineer, or of a registered land surveyor or both, while the said certificate remains unrevoked.

Each registrant hereunder shall upon registration obtain a seal of the design authorized by the Board bearing the registrant's name and the legend, "Registered Professional
