

Bureau of Milk Control, in which event such term shall mean and refer to the duly constituted department of health of such city or town, or the accredited representative of such department.

G. "University of Maryland" shall mean and refer not only to the said University, but to any college, school, division, bureau, or agency of said University to which the said University shall delegate any of the powers or duties conferred or imposed upon it by this Act.

H. "Person" shall mean and include natural person, firm, corporation or association; and the singular shall include the plural, and the plural shall include the singular.

I. "Milk", wherever used herein, shall refer only to milk which is intended for sale for human consumption. "Milk" on the dairy farm, or in the possession of the producer or his agent and until it reaches the processor or distributor, shall mean and include only such as is the whole, unadjusted, unaltered, unadulterated lacteal secretion produced by the complete milking of a healthy bovine animal and which contains no appreciable quantity of colostrum. "Milk", when processed or offered for sale by a processor or distributor, shall mean and include the unadulterated lacteal secretion produced by the complete milking of a healthy bovine animal which contains no appreciable quantity of colostrum and not less than 12% of milk solids of which not less than 3.5% is milk fat.

Wherever the health authority permits the sale for human consumption of the lacteal secretion of any other animal, the term "Milk" shall also refer to such lacteal secretion except where such inclusion would be irrelevant or inconsistent with the context of the term.

J. "Milk Products" shall mean and include all milk and skimmed milk beverages, cream, sour cream, skimmed milk, buttermilk, vitamin D milk, homogenized milk, condensed or evaporated milk or skimmed milk (not packaged in hermetically sealed containers), and all other products of milk intended for human consumption except those within the coverage of this Article 43 relating to frozen such products.

K. "Adulteration" as applied to milk, cream or sour cream shall mean and indicate that water or any substance foreign to milk, other than a vitamin content approved by the health authority, has been added to or mixed with such milk or cream, or that such milk or cream does not conform to the appropriate definition thereof. As applied to a milk product, other than cream or sour cream, adulteration shall mean and indicate that the product contains an unwholesome foreign substance, or that it does not conform to the definition of the product if that product be herein defined.
