

### CHARGE FOR CONNECTIONS

81. *The Town of Mount Airy shall make a charge, the amount to be determined by the council, for each connection made to the town's water or sewer mains. This charge shall be uniform throughout the town, but may be changed from year to year. Arrangements for the payment of this charge shall be made before the connection is made. Any person so desiring may pay one-fourth of the charge set by the council before the connection is made. In this case, the balance due the town shall be paid in three annual installments in the three years next following the year in which the connection was made. Such balance shall bear interest at the rate of six per cent (6%) per year. The revenue derived from these connection charges, over and above the actual cost of the connection, shall be used toward retiring any bonds issued for the water or sewage disposal system and the interest thereon and for other purposes connected with the water or sewage disposal systems.*

### PLUMBING INSPECTION

82. *Before any plumbing work is done in any private building or on any private property, the person, firm, or corporation doing the plumbing shall obtain a permit from the Town of Mount Airy and shall pay therefor such fee as may be established by the council. All plumbing work shall be done under rules and regulations established by the council and inspections may be made by the town to determine that the rules and regulations are being followed.*

### IMPROPER USES

83. *In order to prevent any leakage or waste of water or other improper use of the town's water system or sewage disposal system, the Town of Mount Airy may require such changes in plumbing, fixtures, or connections as it deems necessary to prevent such waste or improper use.*

### PRIVATE SYSTEMS

84. *No water supply, sewerage, or storm water drainage system, and no water mains, sewers, drains, or connections therewith, shall be constructed or operated by any person or persons, firm, corporation, institution, or community, whether upon private premises or otherwise, without the written consent of and under rules prescribed by the council. All cesspools or other private methods of sewage disposal shall be operated and maintained in such*
