

Trustees to be elected.

SEC. 3. *And be it enacted*, That as soon as two thousand shares of the stock aforesaid has been as aforesaid subscribed for, and one-half thereof has been in cash paid in, and the other half thereof secured to be paid when required, the said stockholders upon sufficient notice of the time and place of meeting being given, shall or a majority of them shall meet and elect by ballot twenty-two trustees, one from each county, and one from the city of Baltimore, any five of whom shall constitute a quorum capable of transacting business.

Term of office.

SEC. 4. *And be it enacted*, That the trustees so as aforesaid by the stockholders as aforesaid, first elected shall continue in office for five years and until their successors are in manner aforesaid elected, and all subsequent elections and continuation in office of trustees shall be for two years and until their successors are in manner aforesaid elected.

Trustees to appoint.

SEC. 5. *And be it enacted*, That the board of trustees aforesaid or a quorum of them shall have full power and authority to appoint professors and teachers in the college aforesaid, prescribe their duties, salaries, and fix and determine the duties, wages, cost and charge of all other officers and servants, tuition and board of students, course of study, vacations, examinations, exhibitions and control and manage all persons and things in and belonging to the said Agricultural College, and do and perform and cause to be done and performed all things necessary and proper to continue in successful operation the said Agricultural College and Model Farm, as fully as if herein set forth and mentioned.

Duty of the Board of Trustees.

SEC. 6. *And be it enacted*, That it shall be the duty of the said board of trustees to order and direct to be made and instituted on said model farm annually a series of experiments upon the cultivation of cereal and other plants adapted to the latitude and climate of the State of Maryland, and cause to be carefully noticed upon the records of said institution the character of said experiments, the kind of soil, upon which they were undertaken, the system of cultivation adopted, the state of the atmosphere and all other particulars which may be necessary to a fair and complete understanding of the result of said experiments, and they shall also require the instructor of chemistry as far as may be consistent with his other duties in said institution to carefully analyze all specimens of soil that may be submitted to him by
