

(e) *Removal of Names.* If any person so notified to appear at such session has not yet appeared and shown cause why his name should not be erased from the registry, the board shall cause his name to be erased and marked as disqualified, dead or removed, as the case may be, unless a majority of the board are satisfied of their own knowledge or upon competent testimony that such person is entitled to have his name retained on the registry.

(f) *Armed Forces and Absentees.* No person's name shall be erased from the registry during his service in the Armed Forces of the United States or while qualified to vote as an absentee as herein otherwise provided.

(g) *Notice.* Under the heading of "Remarks" opposite each name erased shall be stated the facts as to such erasure, the date thereof, and the grounds and evidence on which made. The member of the board acting as clerk shall notify any person whose name has been erased from the registry of such fact. Such notice shall be sent by mail to the last known address of such person as found on the registry books, and within two days after the name has been so erased.

(h) *Cards and Loose-Leaf Pages.* If cards or loose-leaf pages are used, the boards of registry, instead of drawing a line in red ink through the name and other entries with respect to a voter, shall certify to the Board of Supervisors of Elections of said county the names of all persons whom they have determined not to be qualified voters. Upon receipt of such certification, the Board of Supervisors of Elections shall make an appropriate notation to this effect on said voter's card or loose-leaf page, and shall remove said card or page from the registry book. The elimination of all names from said registry books, whether by reason of death, removal, disqualification or otherwise, shall be effected in like manner by the Supervisors of Elections of said county upon the certification of the boards of registry. All such cards or loose-leaf pages removed from said registry books shall be retained in the office of the Supervisors of Elections for a period of five years, open to public inspection.

34. Certification of Registers. Each board of registry at the end of the session on revision day shall compare and correct the two registers and make them agree. The officers having them respectively in their custody shall then immediately under the last name registered under each letter of the registers sign their names, except that this provision shall not apply if cards or loose-leaf pages are used. All of said officers of registration shall then subscribe, at the end of each register, a certificate in substance as follows:

"We, the undersigned, constituting the Board of Registry in.....
 precinct or district of county,
 in the State of Maryland, do jointly and severally certify that, at
 the registration of voters, in said precinct or district closed on this
 day of, 19....., there were
 registered by us the names which in this book are entered and that
 the number of registered and qualified voters was and is the number
 of"

(Signatures)

The registers shall by noon of the second day thereafter be returned to the Board of Supervisors of Elections.
