

*A133, north 28° 30' 40" West—469.68 feet to the waters of the Patapsco River.*

6A-4. *The County Commissioners may determine, upon petition of any property owner or owners in the drainage area established by Section 6A-3 of this Chapter, or upon their own motion, that such drainage area, in the interest of the public health, welfare and safety, is in need of a storm water or surface water drainage system. After having made said determination, the County Commissioners shall advertise in not less than two issues of at least two newspapers published in Anne Arundel County, that the County Commissioners have proposed to construct in such area, or in part thereof, a storm water or surface water drainage system. Such advertisement shall give the approximate cost of the construction of the storm water or surface water drainage system to be built and the general area in which such system is to be installed. Such advertisement shall advise those persons interested that a hearing will be held by the County Commissioners at a time and place named in said advertisement at which all interested parties may be present and will be heard. The County Commissioners shall be prepared to exhibit at such hearing a plan for said drainage area and a general plan for the storm water or surface water drainage system to be installed therein, including technical information which may be necessary to inform generally any person or persons of the extent and nature of the storm water or surface water drainage system to be constructed. In addition to such plans, the County Commissioners, at such hearing, shall provide data stating the approximate cost of construction of the proposed storm water or surface water drainage system and the specific area or areas to be affected by any special assessment to be levied for the construction of said system. Any determinations or findings of fact made by the County Commissioners pursuant to this Section 6A-4 and Section 6A-5 of this Chapter shall be final and conclusive.*

6A-5. *If, after holding the hearing as more specifically provided for in Section 6A-4 of this Chapter, the County Commissioners shall determine that the public health, welfare and safety requires the construction of the storm water or surface water drainage system, or any modification thereof, which was the subject of the said hearing, the County Commissioners shall thereupon proceed with such construction. Proposals for the said construction shall first be advertised in two newspapers published in Anne Arundel County having general circulation therein once a week for two successive weeks, such advertisement specifying the date by which the proposals must be submitted, which date must be one on which the County Commissioners regularly meet. The contract for constructing the storm water or surface water drainage system shall be awarded by the County Commissioners upon the proposals thus submitted in the manner provided by Section 9—61 of the Anne Arundel County Code, 1957.*

6A-6. *For the purpose of providing funds for meeting the expenses of the County Commissioners for designing and construction, purchase or acquisition of the storm water or surface water systems provided for by this Chapter, the County Commissioners are hereby granted the power and authority to borrow*
