

sonnel of Civil Defense organizations to attend courses in Civilian Defense given by agencies of the Federal Government.

From time to time agencies of the Federal Government schedule at convenient locations throughout the country courses under the general heading of Civilian Defense.

It is advisable that the Directors and all other employees and personnel of Civil Defense organizations in this State and in its political sub-divisions attend such courses of instruction where possible. The materials presented in these courses have been carefully selected as being helpful to Civilian Defense personnel, and in the judgment of the General Assembly of Maryland all persons who are taking part in such work should avail themselves of every opportunity for increasing the knowledge and scope of their work; now, therefore, be it

Resolved, By the General Assembly of Maryland that the Directors and all other personnel and employees of the several Civilian Defense organizations in this State and its political sub-divisions be urged to give frequent and steady attendance at available courses under the heading of Civilian Defense which may be offered by Agencies of the Federal Government.

Approved March 23, 1962.

No. 12

(Senate Joint Resolution 19)

Senate Joint Resolution proposing the establishment of additional resting areas for the protection and conservation of migratory birds in the northern and central portions of the Eastern Shore of Maryland.

The Members of the General Assembly of Maryland are strongly recommending the establishment of additional resting areas for the protection and conservation of migratory birds in the northern and central portions of the Eastern Shore of Maryland.

Resting and nesting areas for migratory birds are of great usefulness in protecting birds from overhunting and thereby building up the migratory bird population so that in the long run there are more migratory birds available for hunting.

The Blackwater Migratory Bird Refuge in the central portion of Dorchester County is a splendid example of the success and utility of such areas. It offers a haven for the resting and nesting of migratory birds where for brief periods they will be protected from overhunting.

Other such areas are vitally needed in the central and northern portions of the Eastern Shore. One good possibility for such an area is at the proposed Tuckahoe State Park which is to get approximately 4,000 acres of which approximately 1,500 acres would be water.
