

(1959 Edition), title "Kent County", to follow immediately after Section 329 thereof and to be under the new sub-title "Plumbing and Health", and all to read as follows:

*Plumbing and Health*

*329A. No person, firm or corporation shall begin the erection or construction of a new building, in Kent County, or undertake the construction of any major additions or alterations to an existing building, which will in any way affect the water supply, sewage disposal or plumbing system in such building, or undertake the installation of plumbing fixtures, appliances connected with the water or sewerage system, sewers or additions to present sewers, without first having obtained a permit from the Plumbing Board of Kent County as hereinafter provided.*

*329B. Applicants for a permit shall be required to give the location and description of the property, including, if applicable, name of subdivision, lot number, size of lot, and nature and size of building or extent of addition or alterations to existing buildings and the method of water supply and sewage disposal and number and kind of plumbing fixtures and/or appliances connected with the water or sewerage system to be installed, on an application form obtainable at the office of the Plumbing Board of Kent County. The said application must be accompanied by a rough drawing showing the size, shape and general location of the owner's property and the location of the existing or proposed building thereon, and the water supply and sewage disposal system in existence or proposed. After said application has been duly processed in the Plumbing Board office, it shall be delivered to the County Health Department for processing and approval. The Health Department shall not approve any application for a permit in any case where it is evident to it that the sanitary requirements cannot or will not be complied with by the owner of the property or where the percolation tests show that a cesspool or tile field will not be satisfactory. When so approved by the County Health Department the application shall be returned to the office of the Plumbing Board who shall issue to the applicant a "Sanitary Construction Permit" upon payment of the fee or fees as determined by the Plumbing Board.*

*329C. All plumbing work done in the County in and about, or in connection with any building, must conform to the Plumbing Code approved by the Maryland State Board of Commissioners of Practical Plumbing and with the regulations of the State Board of Health. All indoor plumbing fixtures must be installed under the supervision of a plumber holding a Kent County plumbing license. Installation of approved dry wells, septic tanks, cesspools or the tile fields must be done under the supervision of a plumber holding a Kent County plumbing license, unless the work is being done by the property owner himself, unless said property is rental property, or as otherwise stated herein.*

*329D. (a) No person shall engage in the business of constructing, remodeling, altering or installing any septic system or part of any septic system unless they are in possession of a valid license issued by the Health Officer. This shall not apply to any person con-*
