

for the purpose of reconstructing and improving highways on the primary and secondary systems of the State by the use of overlays or other recognized measures of improvement; (9) to pay the cost for maintenance, exclusive of the cost of lighting and of snow removal, on the Interstate System of Highways within Baltimore City.

211-I. Any funds not expended by the Commission from the amounts herein annually authorized for future right-of-way acquisition, future engineering and design costs and overlays and improvement of highways shall revert to the construction fund of the Commission and shall be expended by resolution of the Commission for projects included in the document entitled "Highway Construction Program, Fiscal Years 1965 through 1970" or for projects included in the official "Needs Study" program of the Commission, provided, however, such project or projects shall be included in the two year highway construction programs hereinafter referred to in this subtitle, and further, provided, that if any such funds shall become available after any such two year programs are submitted to the local officials, as provided in Section 211J of this article, but within six months before the next regular programs are scheduled for submission, the Commission shall submit a supplemental program to the county or counties involved and include therein the project or projects to be constructed and, in either case, the right of substitution provided in Section 211J shall be permitted.

211-I (1). The Commission is hereby authorized and directed to review all existing contracts with consulting engineers and all other existing contractual obligations entered into by or on behalf of the Commission; and if it is determined that the interest of the Commission will be better served, the Commission may modify, alter or provide for the termination of such contracts.

211J. On or before July 1, 1964, there shall be prepared by the Commission, and approved by Commission resolution and distributed to each member of the General Assembly representing the several counties in the State and to each Board of County Commissioners or to each County Council, as the case may be, a highway construction program for each respective county which shall include the following: (1) the highway construction and reconstruction projects on both the primary and secondary systems of the State Highway System, including projects in the "Go" Program approved by the 1960 session of the General Assembly but not advertised for construction as of the effective date of this Act, which will be constructed or placed under contract for construction during the fiscal years beginning July 1, 1964, and ending June 30, 1966; (2) such programs shall specifically enumerate by location, or other appropriate designation, each of said construction projects and list the order of their priority for construction purposes; (3) the programs shall give the month and year engineering work will be started on each project, the estimated date right-of-way acquisition is scheduled to commence and the estimated date construction is scheduled to commence, and such two year programs and programs provided for in Sections 211K and 211L of this sub-title shall include the construction projects listed in the document entitled "Highway Construction Program, Fiscal Years 1965 through 1970". Within sixty days after receipt of such program by such members of the Legislature and local governing bodies the Commission shall by its resolution except in the case of all projects partially financed by Federal
