

(c) The Department of Maryland State Police is authorized to employ and compensate such personnel as are required to make inspections and issue certificates of inspection under this sub-title.

409.

(a) No certificate of inspection is issued for any vehicle presented for inspection unless and until the equipment of the vehicle meets or exceeds the standards for vehicles as determined by the Department of Motor Vehicles under Section 406. If the inspection discloses the necessity of adjustments, corrections or repairs in order to meet the prescribed equipment standards, the applicant for inspection is informed what equipment does not meet required standards and in what respect, and he has an opportunity to have the equipment corrected and to present the vehicle for re-inspection.

(b) Under regulations prescribed by the Department of Motor Vehicles each inspection facility keeps a record of all inspections, re-inspections and the results thereof and a record of all certificates of inspection issued. Certificates of inspection are serially numbered, designate the inspection station which issued it and contain such other information as the Department of Motor Vehicles may require. Each certificate is valid until such period of time as the vehicle is next required to be registered and titled.

(c) The fee for each inspection is Two Dollars (\$2.00). Re-inspections of vehicles which have been adjusted, corrected or repaired in order to meet the required standards are free of charge.

410.

(a) Whenever the State police or any local police see a motor vehicle being operated with equipment or mechanisms which apparently do not meet the standards therefor as prescribed by the Department of Motor Vehicles, they shall stop the operator of the vehicle and issue to him a warning of defective equipment. The warning directs the owner of the vehicle to present it to any inspection facility under Section 408 of this sub-title for inspection within a period not later than ten (10) days from the date of issuance of the warning. The Department of Motor Vehicles prescribes the form of the warning and furnishes copies to State and local police. The warning is in triplicate, the original of which is presented to the Department of Motor Vehicles. The duplicate copy is presented to the operator of any vehicle stopped and is presented to the inspection station where the vehicle is taken for inspection. The triplicate copy is retained by the issuing officer.

(b) When the vehicle is presented to an inspection facility for inspection, the duplicate copy of the warning is returned to the Department of Motor Vehicles with the notation that the vehicle has been presented for inspection. If the Department of Motor Vehicles fails to receive the duplicate copy of any warning from an inspection facility within thirty days after the date of issuance of the warning, the Department of Motor Vehicles is authorized to revoke the registration of the vehicle. Any registration so revoked may be restored upon receipt of the duplicate copy of the warning showing the inspection of the vehicle or upon receipt of such other evidence as the Department of Motor Vehicles may deem satisfactory to show
