

*depicting the area in a general narrative statement and on a map. It is recognized that the boundaries of drainage basins may not coincide with roads or natural landmarks, but where feasible the narrative statements and maps should indicate a project area by reference to natural landmarks or existing roads. It is not intended, however, that a legal description for the area for which a project is designed to serve be prepared.* (2) The water and sewerage programs shall show for each project, as applicable, the following information: (i) the estimated diameter, length and location of the line or lines; (ii) the estimated capacity and approximate location of any pumping station involved or proposed; (iii) the population figures, and the Commission's statement of the basis therefor, involved in the area for which each sewer project is designed to serve; (iv) the fiscal year or years in which the Commission contemplates construction of the project; (v) a summary statement of the Commission's reasons for listing the project in the program; (vi) the estimated cost of each project, or stages thereof if the project is proposed for construction in stages in different fiscal years; (vii) the amount of any contribution to construction the Commission has received or has required, as of the date of submission of the proposed program, as a condition precedent to construction of the project or of any stage thereof. (4) Each program shall include as a project, including the right of the County Council to disapprove or designate as limited access or request deferral, all as in subsection (d) set out, (i) any previously approved project with respect to which none of the requirements of the Commission precedent to construction have been accomplished and one year has elapsed since the last date of approval; (ii) any previously approved project with respect to which all of the requirements of the Commission's conditions precedent to construction have not been accomplished, and two years have elapsed since the late date of approval; and (iii) any previously approved project with respect to which a construction contract has not been let and three years have elapsed since the last date of approval. For the purposes of this section, the five-year projected programs of major extensions of sewer and water facilities shall include sewer mains of fifteen inches or over, water mains of sixteen inches or over, sewage or water pumping stations, force[d] mains, storage and other major facilities, *except such of those lines as are necessary to replace or reinforce existing mains or, with respect to water mains, those which will provide only local service and may be of a hereinabove mentioned size merely as a small segment of a future main so as to avoid unnecessary and uneconomical duplication at the time of construction of a subsequent major project.* [The program shall indicate, by project, those lines for which construction contributions have been made or committed, together with the amounts of such contributions, as of the date of the preparations of the proposed program.] Each program shall be available to public view and inspection at the Commission offices and a reasonable number of copies shall be made available [at cost] to satisfy all reasonable requests therefor.

[(b)] (e) Recommendations of Park and Planning Commission. Fifty or more days before the required adoption date of its annual five-year sewer and water construction programs, the Commission shall transmit to the Maryland-National Capital Park and Planning Commission its proposed programs, along with a general statement in explanation of *each*. [such proposed program, and the] The Sanitary Commission shall not thereafter adopt its final [construc-
