

the Director of Bureau of Mines showing the location of the tract or tracts of land to be affected by the operation contemplated. Aerial photographs shall be acceptable if the photographs show the details to the satisfaction of the Director of Bureau of Mines. Such map, plan, or photograph shall be prepared and certified by a competent Engineer, Surveyor, or other person, approved by the Director, and shall show the boundaries of the area of land which will be affected, the drainage area above and below the area, the location and names of all streams, roads, railroads, and utility lines on or immediately adjacent to the area, the name of the owner of the area, and the nearest municipality. The map, plan or photograph also shall show the results of test borings which the operator may have conducted at the site of the proposed operation, and the plan shall include data such as the nature and depth of the overburden, the thickness of the coal seam, a complete analysis of the coal seam, the crop line of the coal seam, and the location of the test boring holes. The information pertaining to test borings, the depth of the overburden, the thickness of the coal seam, the analysis of the coal seam, the crop line of the coal seam, and the location of the test boring holes shall be deemed confidential information and shall not be deemed a matter of public record.

(c) Special Reclamation Fees. In addition to fees required in this Bill SUBHEADING, every applicant for a permit to surface mine coal, before permit is issued, shall pay to the Director a special reclamation fee of thirty dollars (\$30.00) for each acre of land affected (matched by the State), which fee is to be deposited in the Bituminous Coal Open Pit Mining Reclamation Fund. The payment shall be based on the same number of acres as that for which bond is required. The Governor each year shall place an item in the budget to provide for the matching moneys required by this paragraph. These matching funds may be provided by the State in the current budget at the time the permit is issued or in the next succeeding State budget.

(d) The operator is responsible for the prevention of avoidable stream pollution in excess of standards established by the Department of Water Resources.

(e) Unless leases in existence on June 1, 1967 do not so provide or permit, the application for a permit shall include, upon a form prepared and furnished by the Bureau, the written consent of the landowner for entry upon any land to be affected by the operation, by the operator or by the State or any of its authorized agents, within a period of five years after the operation is completed or abandoned, for the purpose of backfilling, planting, reclamation, and inspection.

(f) The Bureau of Mines shall not issue any additional permits to any operator who has failed, or continues to fail, to comply with the provisions of this subheading under any permit previously issued.

(g) If the requirements of this subheading are met and no claims are outstanding under this subheading against the operator, or in the case of any corporation against any officer or director, a permit shall be issued. Additional permits are subject to all requirements of the original permit.

(h) If the Director does not approve the application for a permit, or any amended application for a permit, he shall promptly
