

Board and may also be required to pass an oral or written examination or both, as the Board may determine.

(2) As an engineer-in-training :

(a) Graduation in an approved engineering curriculum of four scholastic years or more from a school or college approved by the Board as of satisfactory standing, and successfully passing a written examination in the basic engineering subjects ; or

(b) A specific record of four years or more of experience in engineering work of a character satisfactory to the Board and successfully passing a written examination in the basic engineering subjects.

(3) As a land surveyor :

(a) Graduation from a school or college approved by the Board as of satisfactory standing, including the completion of an approved course in surveying ; and an additional two years or more of experience in land surveying work of a character satisfactory to the Board and indicating that the applicant is competent to practice land surveying ; or

(b) A specific record of six years or more of experience in land surveying work of a character satisfactory to the Board and indicating that the applicant is competent to practice land surveying ; successfully passing a written, or written and oral, examination in surveying prescribed by the Board ; or

(c) A specific record of ten years or more of lawful practice in land surveying work of a character satisfactory to the Board and provided applicant is not less than thirty years of age ; or

(d) At least two years' experience in land surveying work of a character satisfactory to the Board and indicating the applicant is competent to practice land surveying, provided that the applicant shall have been licensed by said Board as a registered professional engineer, and shall appear on the official roster of said Board as majoring or qualified in civil engineering.

No person shall be eligible for registration as a professional engineer, or land surveyor, or certification as an engineer-in-training, who is not of good character and reputation.

In considering the qualifications of applicants, engineering teaching may be construed as engineering experience.

The satisfactory completion of each year of an approved curriculum in engineering in a school or college approved by the Board as of satisfactory standing, without graduation, shall be considered as equivalent to a year of experience in subparagraphs (1) (b) and (2) (b) of this section. Graduation in a curriculum other than engineering from a college or university of recognized standing may be considered as equivalent to two years of experience in subparagraphs (1) (b) and (2) (b) of this section ; provided, however, that no applicant shall receive credit for more than four years of experience because of under-graduate educational qualifications.

The mere execution, as a contractor, of work designed by a professional engineer, or the supervision of the construction of such work as a foreman or superintendent shall not be deemed to be the practice of engineering.
