

(1) Diagrams of sample ballots, of suitable size, representing such part of the face of the voting machine as will be in use in the election and accompanied by illustrated directions for voting on the machine. Such diagram shall be posted in a prominent position within the polling place.

(2) A mechanically operated model of a portion of the face of a voting machine, for instruction of the voters. Such model shall be placed in a prominent position within the polling place.

(3) A seal, for sealing the machine after the polls are closed, unless the construction of the machine is such that the machine is automatically locked and sealed when the results are exposed; an envelope for the return of the keys, if the construction of the voting machine shall permit their separate return; and such other election materials and supplies as may be necessary, or as may be required by law.

(d) The board shall also deliver sufficient General Return or Tally Sheets, and duplicate Return Sheets, or Statements of Votes Cast. The General Return or Tally Sheet, and duplicate Return Sheet, or Statement of Votes Cast shall be printed to conform with the type of voting machine used. The designating number and letter, if any, on the counter for each candidate shall be printed thereon opposite the candidate's name.

16-11. Operation of machines.

(a) The board shall deliver the keys which unlock the operating mechanism and the registering counters or counter compartment of the voting machine, to one of the judges not earlier than noon of the Saturday preceding an election, nor later than three-quarters of an hour before the time set for the opening of the polls, and shall take his receipt therefor. The keys shall be enclosed in a sealed envelope, on which shall be written or printed: (1) The number of the voting machines; (2) the name or designation of the precinct; (3) the number of the seal; and (4) the number registered on the protective counter or device as reported by the custodian.

(b) The judges shall meet at their respective polls on election day at least one-half hour before the opening of the polls, and shall then inspect the equipment furnished. If at least two judges of opposite party affiliation are present: (1) They shall open the envelope containing the keys to each voting machine and shall, except in the case of machines so constructed as to furnish a printed or photographic record of the setting of the counters and the numbers registered thereon by voting, unlock the counter compartment to ascertain whether the tabulating devices are all set at zero (000), and whether the numbered seal on the operating lever is unbroken, and that the number thereon is identical with the number certified on the envelope containing said keys; (2) They shall also compare the number appearing on the dials of the exposed counter designed to register every consecutive operation of the machine with the reading thereof noted on the envelope containing the keys. If the machine is so constructed as to furnish a printed or photographic record of the setting of the vote-registering counters as they appear prior to the opening of the polls the counter compartment shall not be opened nor shall the counters be exposed to view and such printed or photographic record shall be examined in the same manner as
