

COMPREHENSIVE *Water Pollution Control Program*

75.

*In conjunction with* AS A PART OF the Comprehensive Water Pollution Control Program, the State Health Department and the Department of Water Resources shall submit a joint report to the Governor and to the General Assembly by not later than June 1, 1969, on the water quality monitoring, data processing, and laboratory services needed to meet the water pollution control and abatement needs of the State. The report shall include proposals and recommendations for legislative and administrative action in the field of water pollution control.

76.

*In conjunction with* AS A PART OF the Comprehensive Water Pollution Control Program, the Department of Water Resources shall prepare a report recommending measures to control water pollution caused by silt, acid mine drainage, agricultural drainage and industrial waste not acceptable within sewage treatment plans. For each of the pollutants specified in this section, the Department shall recommend a specific plan for control including a designation of the State agency that would most appropriately assume responsibility for implementing such plan. The report of the Department shall be submitted to all concerned agencies and interests for comment. The report and comments shall be submitted to the Governor and to the General Assembly no later than June 1, 1969. The report shall include proposals and recommendations for legislative and administrative action to improve and implement the requirements of this section.

77.

*In conjunction with* AS A PART OF the Comprehensive Water Pollution Control Program, the State Department of Health and the Department of Water Resources shall submit a joint report to the Governor and to the General Assembly no later than June 1, 1969, which shall summarize the water pollution control program for the State. The report, which shall be prepared annually, shall include:

(1) Status of comprehensive county water supply and sewerage plans developed in compliance with Section 387(c) of Article 43 of the Annotated Code of Maryland.

(2) Status of implementation programs for achieving the water quality standards of the State. Outstanding violations and the status of correction shall be included.

(3) Status of interstate compacts and programs of interstate agencies.

(4) Status of studies and programs developed pursuant to this Act.

(5) Description and status of related Federal plans and studies.

(6) Other State programs pertaining to water and related land resources. The report shall include proposals and recommendations for legislative and administrative action to improve and implement the requirements of this section.
