

*which are made applicable to the transition period, shall terminate on June 30, 1970.*

[(a) *Adoption.* The Commission is hereby directed to adopt on or before October 1, 1967, five-year projected programs of major extensions of sanitary sewer and water facilities which it contemplates may be made in the following five fiscal year period in the Sanitary District and in such other areas within Montgomery and Prince George's County as the Commission may deem appropriate for inclusion within the Sanitary District within that period, and to revise and bring the programs up to date on or before every first day of October thereafter by providing for a similar five fiscal year period. The programs and annual revisions thereof shall set forth the fiscal year in which the Commission contemplates the construction and estimated cost of each project included therein, and the Commission shall thereafter adhere to and follow such programs for the extension of its facilities and shall not construct any project prior to the fiscal year in which it is scheduled in said program until and unless the County Commissioners for Prince George's County, if the project is to be constructed in Prince George's County, or the County Council for Montgomery County if the project is to be constructed in that county, by resolution shall determine and declare that for the immediate preservation of the public health and safety, it is necessary to change the order of priority and to direct the extension of such facilities without regard to the order of priority previously established, and except as otherwise required by this section. The programs to be adopted on or before October 1, 1967, and each annual revision thereafter, shall be prepared, submitted, and adopted as hereinafter specified. As used herein, the term "five year programs" or "five year program" includes the annual revisions, unless the content otherwise indicates.]

[(b) *Content of Program.* Each five year water and sewerage program shall show the addition of new projects and the deletion, modification, or rescheduling of previously approved projects with the following information concerning each such project: (1) the estimated maximum diameter, length, and location of water and sewer lines; (2) the capacity, and approximate location, of pumping stations; (3) the maximum population which could be served by each sewer construction item as it is proposed to be designed; (4) the maximum area limits which could be served by gravity systems for each sewerage system construction item and the area which each such item is designed to serve, such areas to be set forth in a general narrative statement and on a map; (5) the demonstrated need for each project which will include a presentation of appropriate facts justifying such proposed construction and (6) the estimated cost of each construction item in the program. Any material change in the finally adopted five-year program, excluding only normal deviations from the listed estimated costs shall require an amendment of the program in accordance with the provisions of this section. With the programs the Commission shall also submit the same information for all projects which have been previously approved with respect to which a construction contract has not been let and one year has elapsed since the last date of approval. For the purposes of this section, the five-year projected programs of major extensions of sewer and water facilities shall include sewer mains of fifteen inches or over, water mains of sixteen inches or over, sewage or water pumping stations, force mains, storage and other major facili-
