

Sec. 10-13. Same—Same—Qualifications.

In order to qualify for a master general electrician license the applicant must show to the satisfaction of the board that he has been actively in charge of electrical installation work under the supervision of a master general electrician for a period of at least three years prior to this application for such a license and must successfully pass an examination as to his qualifications as provided in section 10-19 of this Code.

Sec. 10-14. Same—master limited electrician license—Scope ; prerequisites for issuance generally.

A master limited electrician license shall be issued to any person, FIRM OR CORPORATION and shall specify the representative OR REPRESENTATIVES of the person under whose direction the work authorized by the license shall be performed. Such license shall authorize the holder to perform, or to have performed, under the direction of its designated representative any of the work described in section 10-10 of this Code, but only on the premises occupied by the holder of such license. ~~The applicant for such license shall submit to the board proof that it has in its employ a representative qualified to supervise the type of work performed by the applicant on its premises.~~

Sec. 10-15. Same—Same—Qualifications.

In order to qualify for a master limited electrician license the applicant must submit to the board the name of the representative OR REPRESENTATIVES under whom the work is to be done or supervised and prove to the satisfaction of the board that the representative has worked under the direction or supervision of a qualified person for at least two years, and shall satisfactorily pass an examination for this type of license.

Sec. 10-16. Same—Restricted electrician's license—Scope.

A restricted electrician's license shall be issued to any person determined to be qualified by an examination given by the board and shall permit the holder to install, maintain and repair the particular type or types of electrical equipment specified in the license. Any one or two, when related, of the following may be so specified: Electrically operated heating furnaces, electrically operated air conditioning and refrigeration equipment, electrically operated elevators, electric display signs, motor repairs, motor services, radio, television and electronics, or to maintain or repair but not to install, electrical household appliances. The holder of this license, other than that issued for electrical household appliances, radio, television, electronics, motor repairs and motor services shall be permitted to make installation of electrical wiring from the point of distribution to and the equipment being installed. This license may be issued to any firm or corporation if and so long as it has in its employ at least one holder of a restricted electrician's license.

Sec. 10-17. Same—Same—Qualifications.

The applicant for a restricted electrician's license shall establish to the satisfaction of the board that he has been actively in charge of electrical installation work under the supervision of a master general electrician or restricted electrician for the period of at least two years and shall satisfactorily pass an examination with respect to the particular branch or branches to be covered by the license applied for.

Sec. 10-18. Application for license.

The application of an individual for a license pursuant to the provisions of this title, shall be made in his own handwriting on a form supplied
