

*pedestrians lawfully within the intersection or an adjacent cross walk at the time the signal is exhibited.*

*(ii) Vehicular traffic facing a green arrow signal, shown alone or in combination with another indication, may cautiously enter the intersection only to make the movement indicated by the arrow, or another movement as permitted by other indications shown at the same time. Vehicular traffic shall yield the right of way to pedestrians lawfully within an adjacent cross walk and to other traffic lawfully using the intersection.*

*(iii) Unless otherwise directed by a pedestrian-control signal, as provided in section 11-203, pedestrians facing any green signal, except when the sole green signal is a turn arrow, may proceed across the roadway within any marked or unmarked cross walk, in the direction of the green signal.*

*(2) Steady yellow indication.*

*(i) Vehicular traffic facing a steady yellow signal is thereby warned that the related green movement is being terminated or that a red indication will be exhibited immediately thereafter when vehicular traffic shall not enter the intersection.*

*(ii) Pedestrians facing a steady yellow signal, unless otherwise directed by a pedestrian-control signal as provided in section 11-203, are thereby advised that there is insufficient time to cross the roadway before a red indication is shown, and no pedestrian shall then start to cross the roadway.*

*(3) Steady red indication.*

*a. Vehicular traffic facing a steady red signal alone shall stop at the near side of the intersection and the stop shall be made at a stop line when one is marked, and if no stop line is marked, then before entering any cross walk, and if there is no stop line or cross walk, then before entering the intersection, and traffic shall remain standing until a green indication is shown.*

*b. Unless otherwise directed by a pedestrian-control signal as provided in section 11-203, pedestrians facing a steady red signal alone shall not enter the roadway.*

*(b) If an official traffic-control signal is erected and maintained at a place other than an intersection, the provisions of this section shall be applicable except as to those provisions which by their nature can have no application. Any stop required shall be made at a sign or marking on the pavement indicating where the stop shall be made, but in the absence of a sign or marking the stop shall be made at the signal.*

**§ 11-202.1. Funeral processions.**

*(a) Any other provisions of this subtitle to the contrary notwithstanding, it shall be lawful for a funeral procession to continue through or to make a turn at an intersection facing a red signal, provided the first vehicle in the procession has already entered the intersection before the signal has changed from green to red.*
