

“stabilizer” or “emulsifier” composed of wholesome edible material. It shall contain not less than three per centum nor more than five per centum by weight of total milk solids and weigh not less than five and one-half pounds per gallon.

(e) (i) “*Parevine*” means a pure clean frozen product made from a combination of food fats, water, one or more protein or carbohydrate food ingredients from other than milk, milk products, meat or their derivatives, optional sweetening ingredients other than lactose as approved by the State Department of Health with or without eggs or egg products, harmless flavoring, with or without harmless coloring and with or without added vegetable stabilizer or vegetable emulsifier. It shall contain not more than one half of one per centum by weight of stabilizer and not more than one fifth of one per centum by weight of emulsifier. Parevine shall contain no milk or meat products or their derivatives. It shall contain not less than ten percent food fat except when fruit, nuts, cocoa, chocolate, maple syrup, cakes or confections are used for the purpose of flavoring, then such reduction in food fat as is due to the addition of such flavors shall be permitted, but in no such case shall it contain less than eight per centum by weight of food fat. In no case shall any parevine weigh less than four and one-half pounds per gallon and contain less than one and three tenths (1.3) pounds of total food solid per gallon. Parevine shall be sold, held, or offered for sale by any manufacturer, wholesaler, retailer or any other seller only in properly labeled factory-filled containers not larger than one gallon. Parevine may be served for consumption on the premises, provided the individual service is taken from a properly labeled factory-filled container no larger than one gallon. When parevine is served on the premises a sign must be displayed which shall read “Parevine Served Here” in letters that can be read by consumers under normal conditions of use. Such sign shall include a list of all ingredients in a manner prescribed by the State Department of Health, provided, however, that the type of food fat used must be specified in letters that can be read by consumers and, provided further, that the type of food fat ingredient or ingredients shall be identified as to specific source. Optionally, all information required to be printed on the sign may be printed on a menu when a menu is provided each consumer. The label on packages of parevine shall, in addition to other required information, include the name “Parevine” in a conspicuous manner and shall include a complete list of all ingredients in a manner prescribed by the State Department of Health, provided, however, that the type of food fat used must be specified.

(ii) “*Water ice or fruit ice*” is a pure, clean, frozen product made from sugar, dextrose, corn syrup in dry or liquid form, water and harmless fruit or fruit juice flavoring and with or without harmless coloring, with not less than 0.35 of one per centum of fruit acid, as determined by titrating with standard alkali and expressed as lactic acid, and with or without added “stabilizer” or “emulsifier” composed of wholesome edible material. It shall contain no milk solids and weigh not less than five and one-half pounds per gallon.

(f) (i) “*Food fats*” for the purpose of this definition and standard are edible natural fats derived from vegetable sources. Such food fats may be hydrogenated or nonhydrogenated. Harm-
