

SEES, IT BEING THE INTENTION THAT THE COUNTY SHALL NOT BE RELIEVED OF ANY OTHER REQUIREMENTS OF THIS SUBTITLE.

Section 11-409

(a) Prior to initiation of sanitary landfill operations, all necessary site preparation work will be completed at the sole expense of the licensee to the satisfaction of the Department of Public Works, the County Health Officer and the Fire Marshal. This will include, but not be limited to, access road(s), gate(s), or barricades, fencing, necessary drainage, all-weather job road(s) to work area(s), employee facilities, utilities, trench or cell excavation to permit upon commencement of operations, uninterrupted flow of work and construction or provision of fire breaks and water supply as necessary.

(b) Access to the site shall be limited, and the gates and barricades will open only when an attendant or operator is on duty. Gates will be locked at all other times. THERE SHALL BE NO SCAVENGING ON THE SITE.

(c) The operator will conduct his operations in accordance with the approved design and development plans and specifications.

(d) Necessary equipment for spreading and compaction of refuse and cover material, and delivery of cover material to the work area will SHALL be available at all times to assure the conduct of proper sanitary landfill operations.

(e) No refuse shall remain uncovered for more than ~~twelve (12)~~ SIX (6) hours from the time of deposit.

(f) The operator shall control blowing papers by means of portable fencing, a hosed water supply, or by other approved means. All scattered materials shall be collected and placed ~~on~~ IN the fill.

(g) Water pollution during site development and operations shall be prevented in accordance with the regulations of the ~~Maryland State Water Pollution Control Commission~~ MARYLAND STATE DEPARTMENT OF NATURAL RESOURCES.

(h) Vermin and rodent life shall be eliminated by carrying out routine landfill operations promptly in a systematic manner. If necessary, supplementary control measures shall be performed within twenty-four (24) hours.

(i) The licensee shall be ready and have suitable measures to control dust, acceptable to the County Health Officer, when dust conditions develop. When for any reason suitable measures are not taken when dust conditions develop, the licensee shall take such action when ordered. under any circumstances not later than twenty-four (24) hours from a given order.

(j) Hazardous and Special Waste will not be accepted for disposal at regular sanitary landfill site unless specifically approved by the County Health Officer.

(K) RUBBER TIRES SHALL BE SHREDDED OR CUT IN NO LESS THAN QUARTER SECTIONS BEFORE DEPOSIT IN ANY SANITARY LANDFILL.
