

(d) If, in the course of work, it is found necessary to make any change from the plans and specifications on which a permit has been issued, amended plans and specifications shall be submitted and a supplementary permit shall be issued to cover said change after the same conditions required to secure the original permit have been satisfied. Plans and specifications where required shall be no less detailed than line drawings which show:

- (1) The direction of flow,
- (2) Pipe sizes,
- (3) Locations and type of fittings, fixtures and equipment, and
- (4) Length of lines and differences in elevations.

(e) A permit shall expire six (6) months after its issuance unless extended in writing by the Director. If any work started under a permit is subsequently discontinued, the permit shall expire six months after the last work was done unless extended in writing by the Director.

(f) No licensee shall apply for a permit or commence work on another licensee's work unless the original licensee has withdrawn or has been removed from said work and notified the Department in writing. The letter of explanation from the person for whom the work is to be performed or either or both licensees shall be sent to the Director explaining the circumstances of the case. In the event that the original licensee cannot be notified or does not respond within ten (10) days, the Director, upon advice of the Gas Commission, may authorize another licensee to apply for a permit to complete the work in question.

(g) If the gasfitter who signs an application for a permit dies, the permit will be held in abeyance from the date of such death. The extent of the work satisfactorily completed by the deceased will be recorded on the gas inspector's record and on the permit, which will then be held in abeyance. If the owner decides to have the remainder of the work done, the original permit will be reactivated upon his written request, to the extent of the uncompleted work. The gasfitter who is to complete the work shall sign the original plumbing application on file at the Department of Inspections and Permits and he will be held responsible for his work.

Section 12-1904

(a) Permit fees for gas fuel-burning equipment shall be charged as follows:

1 1/4 inch diameter or less	\$ 4.00
1 1/2 inch diameter	\$ 5.00
2 inch diameter	\$ 6.00
2 1/2 inch diameter	\$ 9.00
3 inch diameter	\$ 12.00
4 inch diameter	\$ 24.00
6 inch diameter	\$ 48.00
8 inch diameter	\$ 90.00
10 inch diameter	\$120.00
12 inch diameter	\$180.00

Gas burner permit fees are based on the size of the gas pipe leading from the gas meter in the building or on the size of the service gas pipe entering a building or on the size of the gas pipe leading from an existing gas service pipe inside of a building. The permit fee for any gas burning
