

22.

(a) *The total amount of explosive or pyrotechnic composition, including raw materials, material being processed, and finished products, that can be safely permitted in any building at a given time shall be determined and promulgated by the State Fire Prevention Commission. These limits shall be posted conspicuously on each building and strictly adhered to.*

(b) *All buildings shall be kept clean, orderly, and free from accumulation of dust or rubbish. Powder or other explosive materials, when spilled on the floor, shall be immediately cleaned up and removed from the building.*

(c) *Adequate and appropriate fire extinguishers meeting state fire prevention code requirements shall be located in buildings and shall be readily accessible at all times.*

(d) *Rags, combustible and explosive scrap, and paper shall be kept separate from each other and placed in approved marked containers. All waste and reject hazardous material shall be removed from all buildings daily and removed from the plant at regular intervals and destroyed by submersion in water, or by burning. Nonhazardous waste shall be removed from the plant at regular intervals and disposed of in a public dump or by other suitable means.*

(e) *Testing of fireworks and components of fireworks as defined in this subtitle shall be performed in an area set aside for that purpose and located at a safe distance, considering the nature of the materials being tested, from any plant building or other structure.*

(f) *A licensed fireworks manufacturer may experiment with fireworks, pyrotechnics, and the components thereof only as permitted by the State Fire Marshal.*

23.

(a) *No person other than authorized employees or representatives of departments of federal, state, or political subdivisions of the State governments having jurisdiction over the establishments shall be allowed in any fireworks plants; except as have signed in, stating the nature of the visit. A record of these visits shall be maintained for at least two years and subject to inspection by the State Fire Marshal, or his representatives.*

(b) *No smoking or carrying of lighted pipes, cigarettes, cigars, matches, lighters, or open flame, is permitted inside within the plant fence; except that smoking may be permitted in office buildings or buildings used exclusively as lunchrooms or rest rooms and in which the presence of fireworks or any explosive composition is prohibited. Authorized smoking locations shall be so marked, contain suitable receptacles for cigarette and cigar butts and pipe heels, and contain at least one serviceable fire extinguisher of an acceptable type. Persons whose clothing is contaminated with explosives or other dangerous materials to the degree that may endanger the safety of personnel shall not be permitted in smoking locations.*

(c) *Matches, cigarette lighters, other flame producing devices, keys, knives, coins, or other personal articles of metal shall not be*
