WATERSHED MANAGEMENT

7.01. Management Practices.—In discharging its functions and duties under Section 3.01 the Commission shall promote sound practices of watershed management throughout the basin, including, but not limited to, soil conservation, the control of surface runoff and prevention of erosion, the improvement of the quality and yield of water, land reclamation and sound land and forest management, and the maintenance and improvement of fish and wildlife habitat. To this end the Commission may acquire, provide, sponsor, maintain and operate projects and facilities necessary or suitable therefor, and so far as practicable sponsor, aid and promote the basic policies of the soil and water conservation districts of the basin. Any Commission project or facility for the maintenance or improvement of a fish or wildlife habitat or involving the introduction of species new to such habitat shall be subject to approval of the applicable fish or wildlife management agency of the signatory state in which the same is located.

7.02. Watershed Defined.—As used in this article watershed shall mean a region or area of drainage into a particular watercourse or body of water, and includes the basin as well as an area of drainage into a minor tributary and a combination of such areas draining into a larger tributary.

RECREATION

8.01. Planning.—(a) The Commission may include water resources related public recreational projects and facilities in its comprehensive water resources plan and in its amenities plan.

(b) The Commission shall cooperate with the appropriate persons and governmental agencies in planning and effectuating coordinated programs for the construction, operation, maintenance and administration of water resources related public recreational projects, facilities and activities.

8.02. Cooperation.—(a) The Commission shall encourage activities of persons and governmental agencies having water resources related recreational interests and assist in the coordination thereof.

(b) The Commission may provide technical assistance and make recommendations to persons and governmental agencies for the development, operation, maintenance and administration of water resources related recreational programs, projects, facilities and activities.

8.03. Construction, Operation, Maintenance and Administration.—The Commission, alone or in cooperation with one or more persons or governmental agencies, may construct, operate, maintain and
