

(b) Establish minimum requirements for financial responsibility for all damages which may be incurred in the commercial application of the pesticides.

(c) Issue licenses to those meeting the requirements established by the Board and reject any applications which do not meet those requirements.

(d) Establish the conditions under which licenses may be revoked.

(e) Adopt rules and regulations governing the storage, *sale, distribution, exchange*, use and disposal of pesticides and their containers.

(f) Prescribe, when necessary, the time and conditions under which certain pesticides may be *sold, distributed, exchanged, or* used in different areas of the State, and provide, if necessary, that extremely hazardous materials shall be *sold, distributed, exchanged, or* applied only under special permission from the Board.

(g) Define the formulations and establish the conditions and appropriate areas for aircraft application of any pesticides.

(h) Create guidelines and requirements for the application of pesticides by public agencies and bodies politic. These shall include the qualifications of the responsible employees and provision of records to the Board.

(i) Design and conduct an appropriate educational program on the values of pesticides and the necessity for care in their application.

(j) Encourage research which will contribute to the optimal uses of pesticides for maximum public benefit and minimum public damage.

(k) Establish such record systems for pesticide use as may be essential for the public welfare.

(l) Employ such inspectors and other employees as may be necessary for the proper enforcement of the provisions of this subtitle and the rules and regulations promulgated hereunder.

110A-4.

The fee for a custom applicator license, **[or]** a pest control consultant license *or a pest control operator license* is ~~\$100.00~~ \$30.00.

110A-5.

All applications of pesticides shall be by licensed persons with the following exemptions:

(a) The application by aircraft of any substance with the intention of changing, or tending to change, atmospheric conditions.

(b) The application of fertilizer, seeds, or any other similar substances so specified by the Board, when applied by some medium other than aircraft, unless they contain pesticides.

(c) Application of pesticides under permit for research or other purposes from the Board to recognized colleges and universities,
