

VERIFIED BY THE DEPARTMENT OF INSPECTIONS AND PERMITS.

(h) Adequate plans of (i) all drainage provisions, retaining walls, cribbing, vegetative practices, erosion and sediment control measures, or other protective devices to be constructed in connection with, or as part of, the proposed work; (ii) a map showing the drainage area of land tributary to the site; and (iii) estimated runoff of the area served by any drains. Complete storm drainage studies shall be submitted for the site, if not previously submitted, ~~as required by this Subtitle~~ IN ACCORDANCE WITH THE PROVISIONS OF TITLE 13 OF THIS CODE, SUBTITLE 1, "SUBDIVISIONS".

(i) A grading plan for borrow pits, quarries and material processing facilities based on the findings and evaluations of the soil investigation report.

(j) An appropriate legend.

(k) The plan of the site including a one hundred foot (100') adjacent peripheral strip and showing existing topography at a contour interval as hereinafter set forth:

(i) Where the site and the peripheral strip contains grades which average three percent (3%) or less, contours shall have not less MORE than a one foot (1') interval.

(ii) Where slopes on the site and its peripheral strip average more than three percent (3%) through but less than sixteen percent (16%), contours shall have not less MORE than a two foot (2') interval.

(iii) Where the grade on the site and its peripheral strip average more than sixteen percent (16%), contours must have not less MORE than a five foot (5') interval.

(l) Such supplemental reports, data and/or additional information as the Department of Inspections and Permits (acting pursuant to the recommendation of the Department of Public Works) may require to insure the adequacy of the proposed plan. Such reports, data and/or additional information may require that the following be prepared by a registered Professional Engineer employed by or under contract with the applicant.

(M) THE PLAN SHALL PROVIDE FOR EROSION AND SEDIMENT CONTROL MEASURES THROUGHOUT ALL PHASES OF DEVELOPMENT:

(i) PHASE I—STRIPPING AND/OR CLEARING

(ii) PHASE II—ROUGH GRADING AND CONSTRUCTION

(iii) PHASE III—FINAL GRADING AND VEGETATIVE ESTABLISHMENT

(iv) PHASE IV—MAINTENANCE
