

(ii) Backstops shall be constructed of dirt and surfaced with not less than three feet (3') of debris-free dirt. The backstop shall be of such height that a bullet fired from the lowest firing position cannot escape between the last baffle and the backstop.

(iii) The passage way from the firing line to the target pits shall be completely enclosed or shall consist of a trench of sufficient depth to shield a user from exposure to bullets.

(5) For skeet and archery ranges, the area between the stake and target shall be either baffled or fenced on all sides to prevent the projectile from escaping the range area.

Section 13-352.28. Retail Sales Rooms at Industrial Establishments.

Retail sales rooms at industrial establishments shall be permitted in W2 Light Industrial Districts, provided:

(1) Said use is incidental to and located within the principal industrial structure.

(2) Not more than two percent (2%) of the total floor area of said structure is devoted to sales rooms.

(3) Loading and parking for retail use shall be in accordance with the provisions of Article IX of this Subtitle, and all such sales rooms shall have immediate pedestrian access to said parking area.

(4) Said sales rooms shall be located to minimize interference from noise, traffic and odor to other uses with the principal industrial structure.

Section 13-352.29. Sand and Gravel Operations.

Clay and borrow pits shall be permitted in RA Agricultural Residential Districts, W2 Light Industrial Districts and W3 Heavy Industrial Districts, and DD Deferred Development Districts, provided:

(1) The extraction and removal operation of natural material or deposits shall not be noxious, offensive or otherwise objectionable to the surrounding land uses.

(2) Such operation shall be surrounded by fencing measuring not less than six feet (6') in height and screened in accordance with the provisions of Section 13-300.10 of this Subtitle. Such fencing and screening shall have gates to limit access to said areas.

(3) Said operation shall be not less than one thousand feet (1,000') from a residential property.

(4) The use of heavy machinery for refining, or processes other than for washing and screening shall not be permitted, except in a W3 Heavy Industrial District.

(5) At the time of application, a plan shall be submitted for drainage, erosion and sediment control, and the restoration of such excavation sites to a condition of usefulness and reasonable physical attractiveness after excavations have ceased. Such special exception
