

2. The applicant has had at least two season's experience as a lifeguard or operator. The successful completion of the training course given by the Swimming Pool Operator's Training Association of the Washington Metropolitan area or an approved equivalent course may be substituted for one season's experience.

3. The applicant has successfully passed an examination given by the approving authority. Any person who held an operator's license issued by Montgomery County for the previous operating season shall not be required to take a reexamination.

(f) A swimming pool operator's license shall be valid until revoked or until the date one year from the date of issuance. Such license may be revoked by the approving authority for cause, including obtaining a license by fraud.

105-9. Safety standards.

All private and public swimming pools shall be equipped with life saving and emergency equipment which permits the retrieval of persons from the pool without the necessity of having to enter the water. There shall be an operable telephone on the premises on which the pool is located.

105-10. Fees.

The fee for obtaining a public swimming pool operator's license shall be five dollars per year or such amount as the County Executive by regulation may set from time to time. An additional charge of five dollars will be made to an applicant for administration of the examination by the approving authority as provided in this Chapter. The fee for obtaining a permit for a public swimming pool shall be twenty-five dollars per year per pool exclusive of wading and spray pools or such amount as the County Executive, by regulation, may set from time to time. Fees shall not exceed the reasonable costs of administering and enforcing this Chapter. There shall be no operating permit fee charged for any pool operated by Montgomery County.

Article II. Fencing.

105-11. Enclosure of Swimming Pool.

Every outdoor private pool, including any artificial body of water or structure, basin, chamber or tank, either above or below ground, over eighteen inches deep at any one point, having a capacity for a minimum depth of eighteen inches, which has been dammed up, produced or made by human labor and skill and which is used or intended to be used for swimming, wading, diving or water play, shall be completely surrounded or the property upon which such pool is situated shall be completely surrounded by an approved fence or wall not less than forty-two inches in height, which shall be securely anchored in the ground, and which shall be of such specification and
