(a) Whenever any member of the State Police or any officer of a county police department, or any officer of a police department of a city or municipality observes that a motor vehicle registered in Maryland is being operated with equipment and mechanisms which apparently do not meet the standards therefor as promulgated by the [Department] ADMINISTRATION, he shall stop the operator of the vehicle and issue to him a warning of defective equipment and mechanisms. The warning directs the owner of the vehicle to have the equipment and mechanisms which are indicated on the warning as apparently defective corrected at a place of the owner's choosing within a period of 10 days from the date of issuance of the warning and to forward to the Division verification by an approved facility, signed and dated as required for a certificate, that on a date subsequent to the issuance of the warning the equipment and mechanisms so indicated comply with the standards prescribed by this subtitle. Notwithstanding any other provisions of this section, if the warning issued to the operator of a vehicle is related to an equipment or mechanism defect, and such that the correction of the defect can be certified by visual inspection and without the use of testing equipment, the owner of the vehicle may have the defect corrected at a place of the owner's choosing and take the vehicle to the nearest police department authorized to issue warnings and have the vehicle visually inspected to insure that the defect has in fact been corrected. The Division shall enumerate the equipment and mechanism defects to be visually inspected under this subsection and shall develop and institute procedures for carrying out its provisions.
