

EXECUTIVE ORDERS

(c) A description of the specific variance sought, including the commencement and termination dates for which the variance is sought and the type of fuel, its sulphur content and the quantities thereof, which the petitioner proposes to utilize.

(d) A description of the amount and type of the petitioner's current fuel inventories and of any fuel reserves available to the petitioner at any other facilities owned or operated by the petitioner.

(e) A statement of the reasons why the petitioner is unable to obtain the necessary complying fuel. Documentation shall include:

(i) a list of suppliers, domestic and foreign, from which contracts were solicited, including names, dates and places;

(ii) the types of contracts which were solicited, their respective durations and prices, and the types, quality and quantity of fuel sought; and

(iii) the types of any contracts which were available, but were rejected by the petitioner.

(f) A description of energy conservation measures which the petitioner has adopted or proposes to adopt at its facility.

(g) An estimation of the impact which the variance sought will have on air quality.

(h) Such additional information as the Department requests.

3. Upon the filing of an acceptable variance petition, a public hearing shall be scheduled and held by the Department as soon as possible thereafter, but no earlier than the tenth day following the notice of hearing required by this Section. The petitioner shall prominently advertise notice of the hearing in a newspaper of general circulation in the county or City of Baltimore in which is located the facility or source for which the temporary variance is sought. Except as may be otherwise provided by the Department, this notice shall contain the following information:
