

When the State embarked on the school construction program, it was for the purpose of assuring the construction of adequate school facilities to meet the State's existing and future needs, and to lift from the subdivisions the heavy debt burden associated with such capital construction. It was, and is, not for the purpose of relieving the subdivisions of their obligation to maintain the facilities in accordance with applicable building, fire, and health codes.

The enactment of this bill will either divert large sums from the basic object of the program or saddle the State with an enormous new burden which, at the present time, it can ill afford.

For these reasons, I have vetoed House Bill 1020.

Sincerely,  
/s/ Marvin Mandel  
Governor
